

Glider on Campus Event

Thursday, March 23, 2023

8:30 AM - 12:30 PM

The goal of this event is to share the excitement and love of flight with young people and the entire iLEAD Antelope Valley school community!

This year, all grades (TK-8) are immersed in aero-related projects at the same time! Our 8th graders' Glider Project provides the opportunity to understand the basics of physics and explore the impact of flight now and in the past.

Our 8th grade learners will interact with pilots around a glider as they move through four stations. They'll also meet a pilot guest presenter. After that, all our iLEAD Antelope Valley learners will have the chance to visit the aircraft and talk with the pilots.

For more information about this project, visit [iLEAD Student Aerospace Projects](https://www.ileadstudentaerospacemuseum.org).
